

STAT 184 — Homework 0: Setup Confirmation

Due Wednesday, May 20 at 11:59 PM on Canvas

Your Name Here

AI Disclosure

- ☒ No AI used
- ☐ Syntax / Debugging (e.g., finding a missing comma, fixing an error code)
- ☐ Conceptual explanation (e.g., asking how a `left_join` works)
- ☐ Code Generation (e.g., asking AI to write a function from scratch)

Briefly describe your use (1-2 sentences): I refuse

[Type your explanation here]

```
1 # Uncomment (delete the "#") and run line 33 below ONCE to install the
2 # "tidyverse" package on your machine. Then re-comment.
3 # install.packages("tidyverse")
4 library(tidyverse)
```

Welcome to STAT 184!

The goal of this assignment is to ensure your RStudio environment is configured correctly, your core packages are installed, and you know how to render (knit) a Quarto document.

Question 1: Global Options

In class, we discussed changing two crucial settings in RStudio under **Tools > Global > Options... > General**:

1. Restore .RData into workspace at startup: **Unchecked**
2. Save workspace to .RData on exit: **Never**

Once you have changed those settings, click OK to save them and exit.

Part (a): Why is it important to change these specific settings when working reproducibly in R?

[It's not.]

Part (b): By typing your name below, you confirm that you have successfully changed these settings on the computer you will use for this course.

[Dana Kill Constazo.]

Question 2: Package Check

To ensure that your R environment is working and the `tidyverse` package is loaded correctly in the setup chunk, run the code below to print out the first few rows of a built-in dataset called `mpg`.

```
1 # Replace the comment below with the following code: head(mpg)
2 head(mpg)
```

```
# A tibble: 6 x 11
  manufacturer model displ  year   cyl trans      drv   cty   hwy fl      class
  <chr>         <chr> <dbl> <int> <int> <chr>   <chr> <int> <int> <chr> <chr>

2 audi         a4      1.8  1999     4 manual(m5) f      21    29 p      compa~
3 audi         a4      2    2008     4 manual(m6) f      20    31 p      compa~
4 audi         a4      2    2008     4 auto(av) f      21    30 p      compa~
5 audi         a4      2.8  1999     6 auto(l5) f      16    26 p      compa~
6 audi         a4      2.8  1999     6 manual(m5) f      18    26 p      compa~
```

Question 3: Rendering

Now that you have answered the questions, click the **Render** button at the top of your RStudio script window. It should generate a HTML or PDF file.

Submit that rendered file to Canvas.
